Alberta

INTRODUCTION

This booklet presents, by project, the 1988-89 Estimates of Proposed Investments. For the information of the Legislative Assembly, projects have been reported at a sub-project level, where applicable, and by object of expenditure with comparable figures from 1987-88. Expenditure control exists at the object of expenditure and sub-project level (where a sub-project breakdown exists) insofar as transfers of funds between sub-projects within the same project and between object groupings are subject to Treasury Board control.

ADVANCED EDUCATION

1. Clinical Research Building

AMOUNT TO BE VOTED: $14,100,000

Objective: To fund the construction of a clinical research building that will provide research facilities in medicine respecting delivery and treatment systems.

Implementation: The Department provides grants to the University of Alberta for the purposes of constructing, equipping and furnishing the clinical research building.

AGRICULTURE

1. Farming For The Future

AMOUNT TO BE VOTED: $5,000,000

Objective: To provide funding for agricultural research with the aim of assuring the long term viability of agriculture and the improvement of net farm incomes in the Province.

Implementation: The Agricultural Research Council of Alberta administers the program. It reviews research proposals and approves projects for funding. Research projects can be in any of the following categories: apiculture and entomology; beef and dairy cattle; cereals and oil seeds; forage crops; land use and soils; transportation, processing and marketing; poultry, sheep and swine; and special crops. Approved projects are either funded by a research grant or undertaken directly. New technology is transferred to producers through On-Farm Demonstration projects.

2. Irrigation Rehabilitation and Expansion

AMOUNT TO BE VOTED: $25,000,000

Objective: To assist irrigation districts in rehabilitating irrigation systems which will ensure efficient distribution of water to Alberta's irrigation farmers.

Implementation: Agriculture administers the program and provides grants to 13 irrigation districts for two categories of projects; major works — the rehabilitation of larger canals and the rehabilitation and construction of reservoirs, and irrigation capital works — the rehabilitation of smaller canals and seepage control and drainage projects. Funds are administered under agreements executed annually with the districts. Districts contribute 14% of funding. Research activities are funded from the Support Services sub-project.

ENERGY

1. Alberta Oil Sands Technology and Research Authority

AMOUNT TO BE VOTED: $9,900,000

Objective: To promote and assist pure and applied research into economic and environmentally acceptable methods for the recovery and processing of petroleum from oil sands deposits and heavy crude oil reserves, and for enhancing the volumes of oil that can be produced from conventional oil reserves.

Implementation: In the area of oil sands and heavy crude oil research, the Alberta Oil Sands Technology and Research Authority (AOSTRA) supports field work by petroleum companies to test in-situ recovery processes. Financial assistance is also provided to Canadian universities for research conducted by students and staff, and to the Alberta Research Council for a number of oil sands programs. A program for assisting individual inventors was introduced by AOSTRA in 1983.

For conventional oil enhanced recovery research, AOSTRA also provides financial assistance in support of field work by petroleum companies and laboratory work to test recovery processes.

The rights to the technology arising from these activities are earned by AOSTRA and made available to interested parties for commercial use at fair market value.

ENVIRONMENT

2. Land Reclamation

AMOUNT TO BE VOTED: $2,160,000

Objective: To reclaim land throughout Alberta which has been disturbed and to make it as productive as it was prior to disturbance. The program also involves research to improve methods of reclaiming disturbed lands and to minimize the adverse effects of land disturbance.

Implementation: Environment coordinates the program. Proposals for research and reclamation projects are solicited from a variety of sources. Research projects may be undertaken by departments, industry or the Alberta Research Council. Reclamation projects are managed by the department and may be undertaken by tendering contracts or by entering into agreements with municipalities or industry.
